Authorization for this examiner's amendment was given in a telephone interview with Robert DeWitty, Esq. on May 31, 2005. Applicant reserves the right to file a continuing application(s) to obtain coverage for invention embodiments other than those claimed hereinbelow.

The application has been amended as follows:

The following is an examiner's statement of reasons for allowance:

Lokkesmoe et al, U.S. Patent No. 4,793,942, discloses a deterative system comprising a hypohalite bleach (see col. 8, lines 56-65), a surfactant (see col. 7, lines 20-51), and an inner acetic aqueous phase (see col. 5, lines 54-68). It is further taught by Lokkesmoe et al that the surfactant component is present in an amount of 0.1-50% by weight (see col. 14, lines 47-49). However, patentee differs from applicant in that Lokkesmoe et al does not teach or suggest in general a deterative system that contains 60-75% by weight of a surfactant or the specific bleach required in the newly amended claims.

Accordingly, the claims viewed as a whole would not have been obvious to one of ordinary skill in the art at the time of the invention after viewing the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
